12-12.5	13.5-14

As a General "Rule of Thumb", your **EDEA** Boot Size will be approximately 10mm (one (1) full size) larger than your actual Foot Measurement. There are personal preferences in how Skaters like boots to fit. Some like to actually feel the front of the Boot (but with NO Pressure), others want just a little extra room to wiggle the Toes, and yet others don't want to have a clue where the tip of the boot is (too much "Growth Room"). So Sizing is quite personal and varied.

**+ = Extra Material Lasted Around Foot to achieve additional .5 Centimeter (or extra half Size)**

**Bold = Variance w/ EDEA Chart**

These Sizings should be used as an Approx Reference Only, **NOT** for Actual Conversion to **EDEA** Sizing. Please Use **ACTUAL** Measurements to Determine **EDEA** Sizing
